# Ahmed Anany

## Full-stack JS Developer

## SUMMARY

I am a skilled and experienced web full stack developer with a passion for building innovative and user-friendly applications. I have a strong understanding of both the front-end and back-end technologies, and I am proficient in a variety of programming languages and frameworks. I am also a team player and I am always willing to learn new things.

## RECENT WORKS

### Ytrouty blog

<https://ytrouty-app.onrender.com/>

November 2022

Ytrouty (Means Nothing i just made it up) the first fullstack app i made After i learned Express with MongoDB and the first dynamic website i've ever made with framer motion js library. I used material ui for components and responsiveness also connected with cloudinary account to save all photos and videos that users added in their posts with multer configurations. with validators system to validate signing inputs and cookie parser to Authenticate user existence on the site.

### Relig

<https://bigtunaisyeiling.github.io/Relig-store/#/>

March 2022

Relig it's an unexisted Brand i named it that ,It's Fake store with fake products and the first multipage projects i've ever create .

That was the first time for me to deal with looping and passing data from component to another. i can say vue is way more simple than any framework i've ever used it makes things look easier for some noob guy like me it was my first framework,sure i'm lucky. Until then i don't know bou veux so it tooks much more time to deal with data and emitting it from parent to children somehow it tooks about more than 1 week to finish this.

### Chatting Application

<https://btchatting.onrender.com/register>

April 2023

Chatting is an unexisted app i named it that ,it's a real-time chatting app with real database and socket.io to communicate with my friends .

This Web Application Fully developed by MERN stack and socket.io. Also has some great features like real time notification and as soon as possible I'll add a new feature to it like sending Files inside the chat and create rooms , I've got inspired by Discord .

## VOLUNTEER WORKS

### UltraMicro

**Full Management system for Tanta university**

May 2023

UltraMicro is a full CMS for faculty of science Tanta University developed by group of data and computer science students. It's managing credit hours system, Students GPA, Divisions and Courses. I've taken the responsibility for the whole front-end section additionally getting data from the server, manipulating it then exporting the filtered data
