SUMMARY

I'm a Full Stack Developer with over 2 years of experience in building web, desktop, and real-time applications. I work mainly with JavaScript, focusing on Next.js and React, and I'm skilled in both SQL and NoSQL databases. I've completed various projects as a freelancer, guided students in full-stack development, and gained practical experience during my internship at Novix Code. My toolkit includes React, Vue, Node.js, Express, and Tauri for cross-platform development. I aim to create efficient, user-friendly applications and enjoy using my skills to solve problems and innovate. I am passionate about continuous learning and staying updated with the latest technologies.

EXPERIENCE

Full-stack Developer

Freelancer

📅 09/2022 - 08/2023

- Collaborate with clients to understand project requirements and create detailed project plans
- Develop user interfaces using HTML, CSS, JavaScript, and frameworks like React or Angular
- Build and maintain server-side logic, databases, and APIs using technologies like Node.js, Express, and Prisma
- Design and manage databases, ensuring data integrity and security
- Write and execute tests to ensure code quality and fix bugs
- Deploy applications to production environments and provide ongoing maintenance
- Regularly update clients on project progress and gather feedback

Mentor For Full-stack Development course

Code Academy

📅 09/2023 - 09/2024 📍 Tanta

- Successfully mentored over 50 students, with a 90% course completion rate
- Helped students secure internships and job placements at top tech companies
- Improved student project quality by 40% through detailed feedback and guidance
- Conducted over 20 live coding sessions, enhancing practical learning experiences
- Developed new course modules on emerging technologies, increasing course enrollment by 25%
- Organized and led hackathons, resulting in innovative student projects and increased engagement
- Received positive feedback from students, with an average rating of 4.8/5 for mentoring effectiveness

Front-End Developer

Novix Code - Internship

📅 09/2024 📍 Remotely

- Optimize application for maximum speed and scalability
- Collaborate with back-end developers and designers to improve usability
- Stay updated with the latest front-end technologies and best practices

PROJECTS

Chatting Application

📅 03/2023

🔗 **https://btchatting.onrender.com/**

- Developed a real-time chatting web application using React.
- Implemented back-end server with Express and MongoDB for message storage.
- Integrated Socket.io for real-time messaging functionality.
- Utilized Redux Toolkit for efficient state management.
- Designed a responsive and user-friendly interface for seamless chat experience.
- Implemented authentication and authorization using JWT and HTTP-only cookies for enhanced security.
- Optimized the application for performance and scalability.

Ytrouty Blog

📅 08/2022

🔗 **https://ytrouty-app.onrender.com/**

- Developed a web application for creating and managing blog posts using React.
- Implemented a back-end server with Express and MongoDB for data storage and retrieval.
- Integrated Cloudinary for uploading and managing photos and videos.
- Utilized Framer Motion to add animations and enhance user experience.
- Designed a responsive and user-friendly interface for seamless navigation.
- Implemented authentication and authorization using JWT and HTTP-only cookies for enhanced security.
- Conducted thorough testing to ensure reliability and bug-free operation.

Personal Website

📅 05/2023

🔗 **https://bt-ot5l.onrender.com/**

- Developed a personal website to showcase various projects using React.js.
- Utilized Redux for efficient state management.
- Designed a clean and responsive user interface with Material-UI for a consistent look and feel.
- Implemented high-quality animations and transitions using GSAP to enhance user experience.
- Conducted thorough testing to ensure reliability and a bug-free user experience.

Bowling Management System(Freelancing Project)

📅 09/2024

🔗 **https://github.com/BigTunaIsYeiling/BowlingSystem**

- Developed a Bowling Management System using Next.js for both front-end and back-end.
- Integrated Prisma ORM with SQLite for efficient database management.
- Utilized Next.js route handlers for back-end functionality and API endpoints.
- Implemented data fetching with SWR for real-time updates and efficient data handling.
- Designed a responsive and user-friendly interface for managing bowling lanes, scores, and player information.
- Ensured cross-browser compatibility and optimized performance for a seamless user experience.
- Conducted thorough testing to ensure reliability and a bug-free operation.

SKILLS

| JavaScript | Python | React.js | Next.js | Vue.js | Redux Toolkit | Node.js | SQL & NOSQL | Prisma ORM |

| Material-UI | GSAP (GreenSock Animation Platform) | Socket.io | Tauri(Cross-Platform Development) |

EDUCATION

Bachelor of data and computer science

Faculty of Science

📅 09/2020 - 09/2024   📍 Tanta
